Edition No.6

## LECOL Official Stockists

Lecol 7500 is a floor filler that once mixed with sawdust, generated from sanding, provides an excellent solution to filling gaps and holes in floors. It can also be sanded and overcoated with any of our floor coatings.

## Parking at S&R

Many of you will have noticed that in recent months the 'dreaded' meters have been installed outside our premises. Although we anticipated problems, the end result has generated more available parking spaces outside our building. We can also give you 10p which will provide 30 minutes of parking. Just come to the counter and pick one up.

## Broadband

S&R are now fully computerised with all members of staff connected to the net on a constant basis. If you wish to contact us, here are our email addresses:

**General Enquiries:** [info@smithandrodger.co.uk](mailto:info@smithandrodger.co.uk)

**Sales:** [joanne@smithandrodger.co.uk](mailto:joanne@smithandrodger.co.uk)

**Accounts:** [mattie@smithandrodger.co.uk](mailto:mattie@smithandrodger.co.uk)

**Managing Director:** [imcaslan@smithandrodger.co.uk](mailto:imcaslan@smithandrodger.co.uk)

## OSMO® Official stockist

OSMO Polyx®-Oil is a dedicated floor oil that retains the natural appearance of a floor, it requires more frequent maintenance than Aquacoat but is recognised as being the market leader for floor oil.

## ISF Coatings Official Distributors

Many customers have been informed that over the coming months we will be introducing the ISF range of Pre-Catalysed and Acid-Catalyst lacquers to our range.

For the past 60 years we have manufactured our own Pre-Cat. and A.C. lacquers but over the last five years we have been actively seeking a range of lacquers that can match our lacquers. After many months of testing, visits to ISF's factory, and regular meetings between both parties, we are now happy to announce that we are official distributors of ISF lacquers.

We would only put our name and reputation behind a range of lacquers that meet the highest standards and are convinced that in ISF we have that company. We can now offer an increased range of sheen levels and on-site shade matching (Promatch® machine 20,000 shade capacity) while maintaining the high quality you expect. Prices will be unchanged and a display package is available. Please contact any of us for further information.

Please contact us for prices, and information on all these issues
